

Addiction Medicine Physician/Psychiatrist

The Recovery Research Network is seeking a **medical doctor or doctor of osteopathic medicine** to join an interdisciplinary team driven to save lives by helping patients achieve REMISSION from addiction.

The primary responsibility of the **Addiction Medicine Physician/Psychiatrist** is to offer high quality, evidence-based care to those patients qualifying for Outpatient Treatment for Substance Use Disorder in a collaborative clinician team environment, including nursing, therapist, and peer-support staff. This includes our model for treating substance use disorder, including services that may be required to meet the broader behavioral health needs of the people. The physician will be obtaining and recording a detailed medical history of each patient in the electronic medical records.

The primary qualifications, responsibilities and professional requirements are as follows:

Qualifications:

- Current State of Florida medical license (*will consider candidate willing to relocate to Florida and obtain State of Florida license*)
- Board certified in addiction medicine or addiction psychiatry
- Experience with medication assisted treatment including buprenorphine and naltrexone; **current DEA credentials to prescribe buprenorphine**
- **Leadership** experience, exhibited in line with Company culture.
- **Supervisory** experience, including medical guidance, recruitment, employee relations, performance evaluation
- **Management** experience, including oversight of budgetary and with fiscal responsibility

Responsibilities and Requirements:

- Support the Company's goals and strategies
- Drive improvement of patient care, quality, safety, service and patient outcomes.
- Participate in development of long-range strategic plans, governance structure and objectives for practice management
- Participate in establishment and implementation of organizational policies and procedures, in accordance with Company mission, vision and values
- Provide the primary Leadership and support for medical guidance for clinical employees
- Delegate authority and responsibility as appropriate; while directing and supervising Company activities through managers and support staff

- Participate in recruitment, retention, performance and development of professional and nonprofessional staff
- Collaborate with internal and external customers and stakeholders to resolve issues and enhance relationships.
- Develop and manage systems for outcome measurement and performance improvement.
- Participate in professional development activities to keep current with trends and practices in health care administration
- Reviews plans and budgets of assigned departments monthly and as part of the annual planning and budgeting cycle
- Ensure items are reflective of prudent resource management, are within budget guidelines, and are according to current state and federal laws and regulations;
- Manages relationships with outsourced vendors to include claims, member services, IT and case management
- Manage and oversees provider contracting and provider relations
- Oversees risk contracting and managed care
- Other management, supervisory and clinical, as needed.
